

Angelfish

Done? Let it swim!

1. Scan the QR code with your phone.
2. Take a photo of the whole colouring sheet.
3. Good light, and all four corner markers in frame.

Did you know...

- an angelfish uses its triangular shape to dart quickly between rocks?
- baby angelfish look very different from their parents, with white spots and stripes?
- angelfish pairs stay together for life and care for their eggs together?
