

Crab

Done? Let it swim!

1. Scan the QR code with your phone.
2. Take a photo of the whole colouring sheet.
3. Good light, and all four corner markers in frame.

Did you know...

- a crab walks sideways because its legs are bent that way?
- crabs can drop a claw when they sense danger, and a new one grows back?
- a crab eats its own old shell to get back calcium after moulting?
